

```
import { Server as HTTPServer } from "http";
import { Socket } from "net";
import { Server as IOserver } from "socket.io";

declare module "next" {
  import type { NextApiResponse } from "next";
  export interface NextApiResponseServerIO extends NextApiResponse {
    socket: Socket & {
      server: HTTPServer & {
        io: IOserver;
      };
    };
  }
}
```
